

Advanced Cellular Records Analysis (ACRA)

Level III Course (Advanced)

November 10, 2025—November 12, 2025

8:00 A.M.—4:00 P.M.

Grand Prairie Police Department (Dallas / Forth Worth Area)

1525 Arkansas Lane, Grand Prairie, Texas 75052

This 3-day advanced level course builds upon the information and concepts covered in CTRA, along with the attendee's experience and casework with historical cellular records. The course prepares attendees to explain and present cellular records to a captive audience. Attendees will learn how to generate effective demonstratives and written reports. Attendees will also learn how to organize an effective courtroom presentation, including direct examination, cross examination, attorney preparation, and adversary expert witnesses.

Prerequisites:

- Completion of CTRA, or comparable training and experience
- Extensive cellular analysis and mapping casework
- Working knowledge of Microsoft Excel, Microsoft PowerPoint
- Working knowledge of cell site lists and NDCAC

Course Topics:

- Network operation and architecture
- Timing Advance (TA)
- Raw records analysis
- Record abnormalities
- Demonstratives, reports, and testimony
- Court, attorneys, and expert witnesses

Required Materials:

- Windows computer
- Internet access and web browser (no VPN)
- Microsoft Excel (FULL) and PDF viewer
- Admin. rights, or pre-installed software
- External mouse

Tuition information:

\$825.00 per person
